

International Bibliography of Football History

*Zusammengestellt von Christiane Eisenberg**

Abstract: This bibliography comprises academic books and articles on international football history. However, the borders between academic and popular studies are muddy in this area.

Studies of individual clubs, cities, players and organisers have only been taken into account in exceptional circumstances when the authors have dealt with questions relating to international football history.

The list comprises titles in English, German, French, Spanish and Portuguese; titles in Hebrew are noted in their English translation.
